

# RESTORE YOUTHFULNESS

Your skin is the front line of defence against a hostile environment. The result: sun damage, uneven tone, superficial lines and wrinkles. It's time to help your skin feel young again.

In the past, aggressive treatments such as chemical peels and ablative procedures involved extensive downtime and discomfort. They were not suitable for all skin types.

Fraxis rejuvenation treatments harness your body's own potential to heal itself. They help break down the damaged cells so your body can remove them, then they stimulate your body's natural process to produce fresh, elastic cells that support a more youthful skin.

## STEP 1

Your skin cells are stimulated with a precisely controlled energy source. This triggers your skin cells to renew themselves, producing quantities of the chemicals that gave your skin its youthful elasticity and fullness.

## STEP 2

Your body replaces the damaged skin cells with new, healthy cells.

## STEP 3

The result is younger, firmer, clearer-looking skin. Whether you need a more even skin tone, smoothing of superficial lines and wrinkles, firming – or all three – the Fraxis can turn back the clock for your skin.

Unlock the potential for rejuvenation within your own skin cells. Fraxis's technology works to stimulate your skin to act like the youthful skin you used to have.
