

# WISHPro Plus+

WISHPro Plus+ - A technologically advanced facial treatment device and capsule system.

- Immediate results after the first treatment
- You will need only 15 minutes of our patented non-invasive treatment to make your face look younger, refreshed and healthy.
- Based on Magnetic Infusion Technology (MIT)

WISHPro uses Magnetic Infusion Technology to convert magnetic pulses into an active energy field that creates light or electrical current.

This magnetic field is partially converted to **Microcurrent, Red LED, Blue LED, or Magnetic Pulse** technologies using the different technology heads, and in tandem with the serum-infused treatment capsules, MIT penetrates the active serums into the skin.

The unique combination of the MIT technology with the personal serum-infused treatment capsules, delivers unparalleled results for all skin types and concerns.

A revolutionary concept in skin care treatment uniquely designed to tighten and tone skin almost instantly!

MIT creates magnetic pulses which then convert to a mild electrical energy field. It is this field that allows the heads and capsules to infuse vital serums deep into the skin.
