Our Hydrodermabrasion Machine's Combination Of 3 Technologies For Complete Skin Care

HydraBeauty™ is an advanced hydrating facial machine that combines three advanced skincare technologies for complete skin care for your customers. The three technologies — microdermabrasion, hydrodermabrasion and electroporation, combine deep clean and exfoliation, extractions, antioxidant infusion and penetration of active ingredients to promote long-term skin health benefits.

HydraBeauty™ painlessly removes dead skin cells, blackheads and whiteheads to improve acne-prone or congested skin. With the added benefit of providing intense hydration for aging, dull and dehydrated skin, our professional microdermabrasion machine is suitable for all skin types. It will leave your customers with clearer, brighter and more radiant skin.

TGA Registered, ARTG No. 391630

3-in-1 Skincare Solution

The HydraBeauty is a professional 3-in-1 skincare solution for hydration, rejuvenation and deep cleansing. It ensures the painless removal of dead skin cells, blackheads, and whiteheads, making it particularly effective for individuals with acne-prone or congested skin. Additionally, it delivers intensive hydration, addressing the needs of aging, dull and dehydrated skin. The end result is visibly clearer, more radiant, and rejuvenated skin.

The HydraBeauty is a hydra facial device that combines three advanced skincare techniques to offer a comprehensive skin care treatment. Microdermabrasion, hydrodermabrasion, and electroporation work together to provide a deep cleansing and exfoliation experience, extract skin impurities, infuse antioxidants, and enhance the absorption of active skincare ingredients.

Hydrodermabrasion

By utilizing a powerful combination of two distinct treatment heads (vacuum and vortex) a dual benefit of exfoliation and microdermabrasion is created proving a supreme cleanse of the skin. This process results in clearer, brighter, and better-hydrated skin.

Diamond tip Microdermabrasion

The diamond tip microdermabrasion provides a non-invasive approach to facial skin cleansing. The pairing of the diamond-tip technology and vacuum ensures the effective removal of dead skin cell particles and impurities from the skin's surface. It can also help to reduce imperfections such as wrinkles and unwanted skin pigmentation, leaving you with radiant and glowing skin!

Electroporation

Electroporation uses micro-currents to temporarily create openings in the cell membranes, facilitating the more effective penetration of active ingredients into the deeper layers of the skin.

What skin concerns can be treated with the HydraBeauty?

- Uneven skin tones
- Dehydration
- Acne
- Variations in skin texture
- Dead skin build up and congestion
